

ENGAGING CHILDCARES TOWARD HEALTHIER MOMS AND BABIES

This project is focused specifically on decreasing the amount of safe sleep deaths in the Allen County. We do this by:

- Providing safe sleep materials to childcare providers to ensure babies have a safe place to sleep while in their care and training childcare providers at Safe Sleep Ambassadors
- Increasing the number of infant slots available at childcare centers
- Providing materials and support to help childcares increase in Paths to Quality
- And helping families choose high-quality childcare programs
